ALESSANDRO MACAGNO

ABOUT ME

"Excellent experience, Alessandro managed to involve us, and simply teach us some important concepts of today's world. There was a beautiful climate and a wonderful atmosphere. We would very much like to repeat this experience to have the chance to learn more digital education. We would also like to receive advice about our future. "

WORKING EXPERIENCE

2015 - today
Founding member e-Virdis srl
Startup with 40 shareholders in 3 continents. We take care of users' digital legacy.

MAIN TASKS

The great advantage of working in a startup is the chance to see an incredible number of tasks.

I started as a BackEnd Ruby On Rails developer, but then I had to work on the whole stack: HTML5, jQuery, Bootstrap, CSS3.

I became a member of the entrepreneurial team and responsible for the eLegacy project, thanks to which I learned Vue and Nuxtjs, using Rails only with APIs.

But I also learned how to create Gantt and budget, and respect them together with my team.

I was also in charge of sales, accounting manager, marketing campaign organizer. To do all this I have studied and learned the basics of growthacking, of user experience and I have developed company procedures for managing user feedback.
